

Fire-fighting packages

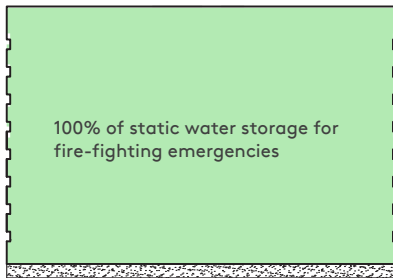

Australian summers can be intense and unpredictable - no one can tell you how hot and dry it might get. Kingspan water tanks are fire resistant, keeping emergency water safe. Including a fire-fighting package with your water tank will ensure you have access to your water when the going gets tough.

Having a tank for static emergency water storage may be a requirement if you are building in a bushfire zone according to BAL ratings 12.5; 19; 29; and 40. Speak to your council for further information. Kingspan offer tanks up to 29,000L in capacity which are made with AQUAPLATE® steel. Common capacities for fire tanks include 5000L, 10,000L and 20,000L. Two typical set ups are featured below:

Typical Single Purpose Bushfire Protection Tank

Typical Dual Purpose Bushfire Protection Tank

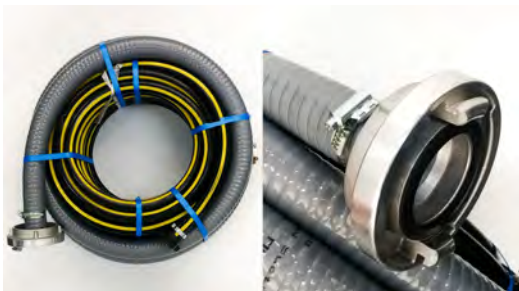

Add a fire-fighting package to your tank and be fire ready today. Packages for NSW, QLD and VIC include:
